PROFESSIONAL SUMMARY

An experienced Risk and Compliance professional with over three years in fraud investigation, document verification, and policy-driven case adjudication. Skilled at resolving complex driver appeals and identifying fraudulent activity to protect platform integrity, applying evidence-based judgment alongside company policy. Adept at handling the full data lifecycle — from extraction to transformation — while automating workflows and translating data into clear, actionable dashboards. Known for independently developing data-driven solutions that strengthen operational outcomes.

WORK EXPERIENCE

Risk and Compliance Specialist - II

Uber | Aug 2023 – Present

- Adjudicate driver deactivation appeals for low ratings and cancellations, using evidence based analysis and company policy to determine reinstatement or confirm deactivation.
- Investigate suspicious activity and fraudulent patterns across driver accounts to protect platform integrity, generating data-driven insights back into policy refinement.
- Conducted fairness reviews to grant justified exceptions to drivers facing low ratings or cancellations, evaluating submitted evidence against documented reasons to ensure equitable outcomes.
- Document case decisions in Jira using standardized templates, referencing internal SOPs for consistent, policy-aligned outcomes.

Data Analyst Internship

Uber | Oct 2025 – Mar 2026

- Developed and executed SQL queries to fulfill data requests and business requirements, ensuring accurate data extraction.
- Designed and maintained interactive dashboards to visualize key metrics and provide actionable insights.
- Automating reporting workflows to streamline query execution and improve the efficiency of data delivery.

Risk and Compliance Specialist - I

Uber | Jun 2022 – Jul 2023

- Reviewed and validated driver-submitted documents — license, profile photo, vehicle registration, inspection certificates, and government ID (where required) — for authenticity and policy compliance.
- Investigated suspicious documentation and profile activity via internal case-management tools, escalating validated risks to safeguard platform integrity.
- Supported the Eats Refunds & Appeasement team on contacts for never-received orders, missing items, late deliveries, and damaged food, applying policy to determine refund/appeasement outcomes.

EDUCATION

Master of Science - Mathematics

St. Francis College for Women
2020 - 2022

Bachelor of Science - Mathematics, Physics and Computer Science

St. Francis College for Women
2017 - 2020

PROJECTS

Query Integration / Product Enhancement

Designed a SQL query that returns driver's safety incident history and severity tier (L3/L4) using driver ID, replacing a manual cross-reference between an internal tool and an internal reference spreadsheet — cut AHT by 30% and improved case quality by 50%.

Proposed embedding incident-tier visibility directly into the internal safety tool to remove the manual lookup step entirely; currently under product review.

Agent Dashboard

Permission-based agent performance dashboard: built the underlying SQL query, automated it via an internal pipeline into a Google Sheet feeding a Looker Studio dashboard where each agent saw only their own metrics while leads saw the full team — removing agents need to repeatedly ask leads for numbers.

Process Improvement

Added a new SOP step for "order later than expected" refunds, requiring agents to check partner-customer communications before processing — since delivery partners often pre-informed customers of delays via text, yet refunds were still being issued. This reduced refund volume for the category by 40%, delivering significant cost savings.

SKILLS

- Data Analysis & Scripting: SQL, Python, Pandas
- Data Visualization: Looker Studio, Tableau, Power BI, Google Sheets, Excel
- Workflow & Automation: Python, Google Apps Script
- Operational: Project Management, Stakeholder Management
- Professional: Critical Thinking, Decision Making, Good Verbal & Written Communication

ADDITIONAL INFORMATION

- Languages: English, Hindi, Telugu, Tamil
- Work Eligibility: Authorized to work in India
- Availability: Open to remote, on-site or hybrid roles
- Interests: Continuously learning new data analytics tools
